#### THE SUPERIOR ISSUE.

AYOR GAYNOR in a letter to Chief Magistrate McAdoo cites police reports to show that on last Sunday only twenty-seven out of 10,775 barrooms "were found to have any curtain or other obstruction or any person inside," and that since Commissioner Cropsey took office "1,439 unfortunate women have been arrested and tried and 1,357 convicted."

These facts are interesting enough in themselves, but they are not pertinent to the superior issue raised in the controversy concerning the so-called "wave of crime." The serious charges are not that licensed saloons evade the Sunday law, but that illicit barrooms are in operation all the time; not that bad women parade the streets, but that crooks and criminals of all sorts, from beggars and sneak thieves to burglars and footpads, have become holder and more menseing to property and to life than at any other time in our recent history.

The Mayor should come to the main point and meet public criticism on its merits. The citizens that elected him wish his administration to justify their votes. He will have none but himself to blame if he loses their confidence.

#### WITHIN THE PROFESSIONS.

ROM the report of the membership committee of the New York County Lawvers' Association it is learned that of 12,130 lawyers in the city upward of three thousand signed the roll of membership when the organization started three years ago; that of these 680 have since dropped out, some of them stating that they cannot afford

to pay the fees, \$10 a year. The figures reveal something of the intensity of the struggle in all professions, for it is safe to say the condition is not peculiar to lawyers. Doctors, elergymen, engineers, artists, actors and authors have each within their confraternity a number of brothers that cannot

keep up with the procession and yet who will not drop out. These men are not always either the worst or the weakest of the profession. Some of them doubtless have fine talents and soaring aspirations, but are lacking in business qualities. They know not how to make their way in the market. Their hopefulness or their obstinacy is often pathetic. They fall into poverty and sometimes into wretchedness, but still they stay in the professional class and scorn those that follow a trade.

#### A BOOK BY ROBIN.

SEPH G. ROBIN is to write a book. It is not a case of the unexpected. A man of his energy, versatility and egotism cannot permit all of this notoriety and free advertising to pass unused to his profit. Moreover, there is a possibility he may use it to the profit of others also.

Dr. Samuel Johnson long ago laid down the doctrine that every man at maturity has had in the course of his life experiences out of which at least one interesting and useful book could be made. The only questions involved in the maturity of the maturity has had in the course of his life does is to have the insurance made over the first of the maturity has had in the course of his life does is to have the insurance made over the first of the maturity has had in the Queen is deputy governor. The insurance is for their maintenence and then be mean to the first of the maturity has had in the Queen is deputy governor. The public audiences at the Vatican. I won't have my children deceived or field to."

A letter you forgot to mail?" asked Mrs. Jarr. asked Mrs. J could be made. The only questions involved in the writing of such a book by any man are, first, whether he has sufficient judgment to know which of his experiences are of real value; second, whether he

No one can question that Robin's career has been sufficiently interesting to justify a book. If he has had no share in the great issues of the nation, he has at least been close to the inside of high finance, and if he has known no great men he has known several big ones. His book, therefore, can be made quite instructive, provided he writes it with the two requisites of good judgment and honesty of purpose. But those are rare qualities.

### HABERDASHERY THIEVES.

UT of the organization of the Haberdashers' League comes a revelation of the curious fact that the robbery of haberdashers' shops in this city has been carried to such an extent that the dealers find themselves forced to combine and to co-operate as a league in self-defense.

It is believed the thieres are members of a considerable band, and that some of them are of sufficient repute and address to get employment as clerks, from which positions they aid their accomplices on the outside. Thus the loss from the depredations is large. In some of the principal shops it is said to amount

Shoplifting has been generally deemed a crime peculiar to women. It is known that department stores have to keep continual guard against it. But the assumption has been that men are proof against that kind of temptation; that no man steals neckties or socks. Now we learn they are worse than the ladies, and another ancient claim of superiority goes glimmering through the units of
